

FERNANDO CIELO

157-17 65th Ave Flushing, NY 11367 · 929-402-7026

Fernandocielo70@gmail.com

As a mechanical engineer, my goal is to make products that help with sustainability. For there is now a bigger effort to tackle the effects of global warming that I would want to be a part of. There are various ideas I have, to help make a difference in the world, which are possible through the opportunity to work with different partners and investors to help achieve this goal. I'm very goal driven, to make a difference in the field of work I do, bringing a good work ethic, multitasking skills, and teamwork.
