I am passionate about pursuing a career in computer science. I have also demonstrated my commitment to learning and developing my skills in this field and am eager to contribute my knowledge and expertise to your organization.

Throughout my studies, I have shown exceptional academic achievement and has developed strong programming skills, particularly in Java and Python. My coursework has included data structures, algorithms, and computer architecture, which has given me a solid foundation in computer science.

In addition to my academic accomplishments, I have completed various coding and programming courses, and have worked on several personal projects, including developing a mobile application that aims to promote sustainable living.

As a young Palestinian-Muslim woman, I have overcome many challenges and obstacles to pursue my passion for computer science. I am a determined and hard-working individual who is committed to achieving my goals and making a positive impact in the tech industry.
